Metro State Cyber Clinic

Computer Science and Cybersecurity

## Cybersecurity Clinic

We are in search of students interested in assisting K-12 schools, underserved municipalities, non-profits, and small businesses enhance their cybersecurity practices. Sponsored by the National Security Agency (NSA) and in collaboration with Minnesota's IT agency (MN IT), this initiative will form student teams to offer pro bono Cybersecurity-as-a-Service. These teams will assess the cybersecurity readiness and risk management of these organizations using Center for Internet Security (CIS) Implementation Group 1 (IG1) controls to strengthen their overall security hygiene.

## Why Apply?

- Get paid for your work
- Build connections with cybersecurity professionals
- CompTIA Security+ certification course materials and exam vouchers will be provided by Metro State University
- Gain real-world, hands-on experience as a cybersecurity consultant
- Develop teamwork, communication, sales, and other valuable soft skills
- Create positive change in the real-world by protecting civil society

If you're a Metro State student interested in applying for this program, please submit your application using the QR code provided.
